

LIFT MASTER

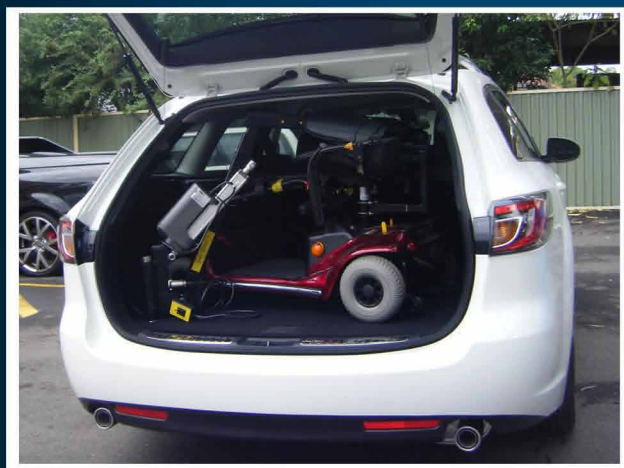

Scooter and Wheelchair Boot Hoist

The Liftmaster assists in the storage of an unoccupied manual or powered wheelchair or scooter in a vehicle's boot, allowing the user to travel independently.

The Liftmaster has been designed with strength and simplicity that places it on the very top of the heap.

- Proudly Australian made
- Can be installed into most wagons, vans and utilities. It is very compact and depending on the wheelchair or scooter configuration, can even be installed into small hatchbacks.
- 3 models are available with additional powered functions:
 - 2-way: Powered up and down
 - 4-way: Powered up and down, and swing in and out
 - 6-way: Powered up and down, swing in and out, and extend and retract the crane
- Lifts scooters and wheelchairs up to 130kg in weight with ease
- Easy, one person operation
- Robust build designed to withstand years of regular use.
