friendly
restraints

Volkswagen Multivan

The Volkswagen Multivan lowered floor modification is the ultimate choice for wheelchair users. This modification offers convenience, comfort and spaciousness. The Multivan is a reliable vehicle and is a popular choice for families and organisations.

How we lower the van floor:

It's simple but complex! We remove a section of the vehicle floor and install a new floor. The new lower floor allows a wheelchair passenger comfortable head height. Wheelchair restraints, a seat belt and a fold-out ramp are also installed. Seating and any other accessories that you require are then installed.

.....40 labour hours later your van is modified, as simple as that!

Features:

- European designed specifically for the VW Multivan.
- Ideal for larger power chairs and taller people.
- The lowered floor is flat where the wheelchair is docked.
- The wheelchair is positioned centrally positioned in the van for a comfortable ride.
- User friendly wheelchair restraints.
- A seating configuration of your choice.
- Wheelchair winch option.

PME AUTOCONVERSIONS
6 KOOKABURRA RD
HORNSBY HEIGHTS, NSW

P: (02) 9482 2808
