

PME

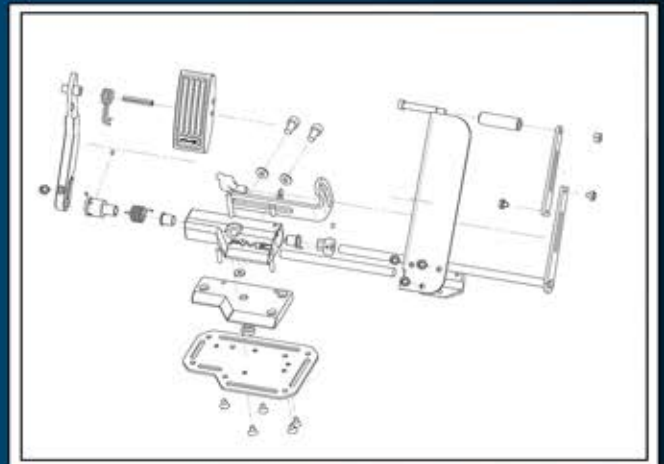

LEFT FOOT ACCELERATOR

The fully adjustable PME Left Foot Accelerator is an adaptive driving control that assists drivers with impaired right leg function.

It allows for safe operation with an automatic transmission vehicle using a left sided supplemented accelerator in conjunction with the original brake pedal.

- Quick release can be removed and refitted with ease
- Easy quick installation
- Fits virtually any vehicle
- Cost effective, can easily be refitted to your next vehicle
- Smooth reliable action utilises oil impregnated bushings
- Cover plate to prevent the factory accelerator being accidentally operated by the right foot and also acts as a footrest
- Footrest angle can be adjusted
- Manufactured to last. CNC machined quality with aluminium and stainless steel components
- Designed and Made in Australia by PME
