

Tri-Spin

Limited Hand Function Orthopaedic Accessory

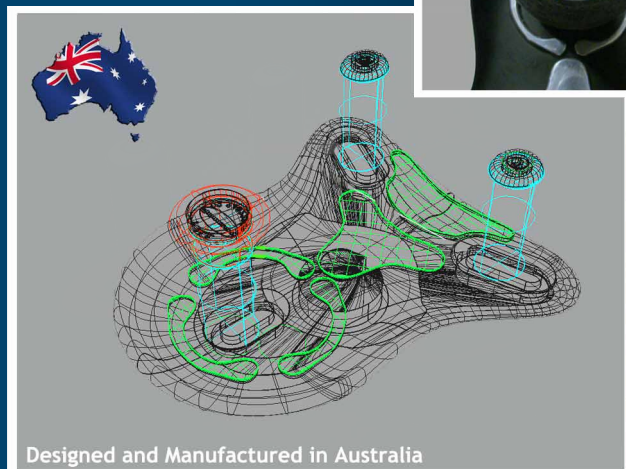

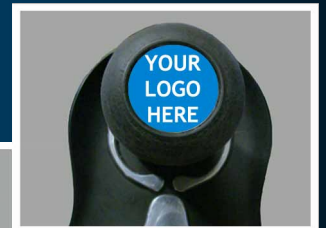

The PME Spinmaster TRI-SPIN assists drivers with impaired hand function or in any one handed steering application

Contoured with a smooth raised edge, the PME Spinmaster TRI-SPIN has been created to fit your hand ergonomically and to complement your interior's styling

- Three rod design, one to grasp and two others to stabilize and support the wrist whilst driving. The driver's hand is prevented from being removed from the device however, the driver is free to move their hand up and out of the device at any time.
- Fully adjustable to suit all hand sizes.
- Supported by the world renowned Spinmaster steering wheel clamp, known for providing superior durability and gripping strength without damaging your steering wheel.
- With its quick release function, the driver can remove the PME Spinmaster TRI-SPIN at any time with the press of a button allowing unrestricted access for other drivers.
- Available in a range of colours to suit any interior.
- Strong, robust design, constructed from heavy-duty mining-grade injection moulded glass filled nylon to withstand years of regular use.
- Proudly Australian made
